PROFESSIONAL SUMMARY

Flutter Mobile Engineer with 4+ years of software development experience and a strong record of shipping production-grade cross-platform applications for iOS and Android. Built and maintained MehticPay, a fintech e-wallet with over 10,000 active users, and contributed to Yulii, a cross-platform productivity app now live on both the Play Store and App Store. Currently working as a Full-Stack Developer at Codelab Projects, where responsibilities span web application development, WordPress engineering, and technical SEO implementation for client platforms. Proficient in Flutter/Dart, Riverpod, Provider, BLoC, RESTful API integration, Firebase, and CI/CD pipelines. Experienced in writing clean, maintainable code, leading code reviews, and collaborating across product, design, and backend teams in Agile environments.

TECHNICAL SKILLS

Flutter/Dart	Flutter SDK, Dart, Widget Composition, Custom Animations, Platform Channels
State Management	Riverpod, Provider, BLoC/Cubit, GetX, setState
Backend & APIs	Firebase (Auth, Firestore, Realtime DB, FCM), Supabase, RESTful APIs
Architecture	Clean Architecture, MVVM, Repository Pattern, Dependency Injection
Databases	PostgreSQL, MySQL, Firebase, SQLite, Shared Preferences
Web	HTML5, CSS3, JavaScript (ES6+), PHP, WordPress, Responsive Design
Testing	Unit Tests, Widget Tests, Integration Tests, Mocking
DevOps	Git, GitHub Actions, Docker, Fastlane, Play Console, App Store Connect
SEO & Analytics	Technical SEO, Core Web Vitals, Google Search Console, Google Analytics, On-Page SEO
Other	NFC Integration, AI/ML APIs, Push Notifications, Figma, Postman

WORK EXPERIENCE

Full-Stack Developer & Technical SEO Specialist | Codelab Projects Jun 2026 – Present

- Develop, maintain, and enhance websites, web applications, and internal software solutions for both the company and its clients, covering front-end and back-end implementation using HTML, CSS, JavaScript, PHP, and MySQL.
- Design, develop, and manage WordPress websites including custom theme modifications and plugin configuration for diverse client requirements.
- Integrate APIs, third-party services, and automation tools to improve system functionality and operational efficiency across client platforms.
- Develop and implement technical SEO strategies and conduct website audits to identify performance, usability, and search visibility improvement opportunities.
- Monitor website performance using Google Search Console, Google Analytics, and similar platforms, providing actionable insights for continuous improvement.
- Troubleshoot and resolve software, hosting, and application-related issues across company and client platforms.

Flutter Mobile Engineer | Mehtic Technology

Jan 2024 – Jan 2025

- Led end-to-end delivery of MehticPay (fintech e-wallet) and Bank Mobile, two production Flutter apps serving over 10,000 active users on iOS and Android, owning the full cycle from architecture through Play Store and App Store release.

- Architected state management using Riverpod and Provider across presentation, domain, and data layers, which made the codebase easier to test and reduced the time spent diagnosing UI-related bugs during code reviews.
- Integrated payment gateways, cryptocurrency APIs, airtime top-up services, and bill payment providers, building retry logic and error recovery adapters for each third-party connection.
- Profiled widget trees using Flutter DevTools to identify unnecessary rebuilds and layout bottlenecks, cutting app load time from around 4.2 seconds to under 3 seconds on mid-range Android devices.
- Designed and implemented biometric authentication flows and encrypted local storage for sensitive financial data, aligning with standard fintech security requirements.
- Led code reviews for the mobile team, establishing widget composition conventions and lint rules that reduced production bug reports over a six-month period.
- Set up CI/CD pipelines for automated testing and staged rollouts, reducing the manual effort involved in each release and catching regressions before they reached users.

React Native Engineer (Contract) | SpecsPay

Late 2024

- Joined a team building SpecsPay, a React Native/Expo fintech payments app featuring wallet management, transaction history, budget tools, card management, and PIN-secured payment flows.
- Built screens and UI components using TypeScript, styled-components/native, and Expo Router file-based navigation, with Redux managing wallet, transaction, and authentication state.
- Applied responsive scaling utilities and custom typography to deliver a consistent interface across varying iOS and Android screen sizes.

Freelance Flutter Developer | Bite Express (Client Project)

2024

- Contracted to fix critical issues on a live multi-vendor food delivery platform serving customers, riders, and vendors within a single Flutter application.
- Integrated Paystack-Titan's virtual account API into the in-app wallet, enabling users to fund balances through dedicated virtual account numbers.
- Diagnosed and resolved wallet bugs affecting balance display and transaction state, then fixed UI responsiveness breakages across multiple Android screen sizes.

Software Engineer / IT Support | Adaptive Computer Solutions (ACS) *2021 – Present (Remote)*

- Developed Yulii, a cross-platform task assignment and social rewards application using Flutter and PostgreSQL, now live on both the Google Play Store and Apple App Store.
- Worked with senior engineers on a SaaS payroll platform and a point-of-sale checkout system, contributing to module development, bug fixing, and testing.
- Provided IT support for internal systems, handling software configuration, troubleshooting application errors, and maintaining development environments.

Frontend Developer | Reverton.Net Limited

Jan 2022 – Mar 2023

- Built responsive, mobile-first web applications using HTML5, CSS3, JavaScript, and PHP across a range of client projects with different design and performance requirements.
- Integrated frontend layouts with backend APIs and CMS platforms, and conducted cross-browser testing across Chrome, Firefox, Safari, and Edge.

KEY PROJECTS

MehticPay | Flutter, MySQL, Firebase | *Live on Google Play Store*

- Production fintech e-wallet enabling real-time transfers, crypto management, bill payments, and airtime top-up, serving over 10,000 active users.

Yulii | Flutter, PostgreSQL | *Live on Google Play Store and Apple App Store*

- Cross-platform task assignment and social rewards app with customisable reward systems, dynamic task delegation, and real-time collaboration features.

Throve | Flutter, FastAPI, PostgreSQL, Python | *Ongoing solo project*

- Building a multi-tenant SaaS inventory management platform end-to-end, covering the Flutter mobile client, FastAPI backend, and a React admin dashboard.
- Implemented JWT authentication with token rotation, 4-tier role-based access control, a real-time fraud detection engine, and a transactional email notification system.

EDUCATION

B.Sc. Computer Science, Second Class Upper Division

2020 – 2024

Ajayi Crowther University, Oyo

Relevant coursework: Mobile App Development, Data Structures & Algorithms, Software Engineering, OOP, Artificial Intelligence, Operating Systems, UX/UI

CERTIFICATIONS

- Certificate in Project Management. World Class ICT Solutions, November 2025
- Certificate in Human Resources Management. World Class ICT Solutions, November 2025
- Diploma in Entrepreneurship. Ajayi Crowther University, July 2024
- National Youth Service Corps (NYSC); Nigeria's mandatory Post Graduation national service, 2025
